

Addendum #1

Date: October 29, 2024

Project

- a. Title: NMAH – Gunboat Philadelphia Temporary Conservation Space
- b. Location: National Museum of American History
- c. SF Project No: 2003106

Remove the requirement to abate ductwork mastic on ductwork to be demolished.

While reports from 2009 indicate that ACM was present in ductwork mastic, full extent of the mastic is unknown. SI proposes to protect the boat in place, then perform testing on the ductwork to determine the extent of abatement. If required, request for abatement will proceed via PCN.
